## 5. Fire-fighting measures

Suitable extinguishing media: Mist of loaded liquid, dry chemicals, carbon dioxide, fire foam, and dry sand are effective.

Unsuitable extinguishing media: Use of straight stream of water can cause a risk of spreading fire.

Specific hazards arising from the chemical: In some cases of fire, may release irritant gases.  
When burnt, may generate carbon monoxide and other toxic gases.

Specific extinguishing methods: Spray water to the surrounding facilities for cooling.  
Keep unauthorized persons off the site of occurrence of fire and the surroundings.  
Even after extinction, cool containers thoroughly with plenty of water.

Special protective equipment and precautions for fire fighters: Wear fire/flame resistant/retardant clothing.  
Fight fire from windward direction while wearing protective equipment. If contact with skin is expected, wear impervious protective equipment and gloves.  
Use air-breathing apparatus and protective clothing whenever necessary.

---

## 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures: Wear protective equipment when working.  
Remove nearby potential ignition sources immediately.  
When mist is generated, use respiratory equipment to prevent inhalation of mist.  
Do not touch or walk through spillage.  
Pay attention to the site of spillage, which is slippery.

Environmental precautions: Avoid release to the environment.  
Prevent spreading of oil spill with earth and sand, sandbags, or other proper materials and use care not to allow the oil spill to flow to street drains, sewer systems, and rivers.

## SAFETY DATA SHEET

At sea, install oil spill containment booms to prevent spreading of spills and absorb with absorption mat or other proper materials.

Methods and materials for containment and cleaning up:

In case of spillage in small quantity, collect spillage by absorbing with earth, sand, sawdust, waste, or other proper materials.

In case of spillage in large quantity, enclose with embankment to prevent spreading of spillage and collect spillage in empty containers to the extent possible.

Prevention of second accident:

In case of spillage, immediately inform the organizations concerned of the spillage to prevent possible accidents and spreading of spillage.

Remove nearby potential ignition sources immediately and make fire-extinguishing agents available. Remove spillage completely, and ventilate and clean the site and the surroundings.

## 7. Handling and storage

### Handling

Technical measures: Keep away from any possible contact with sparks, open flames, and high-temperature materials, and do not allow release of vapor without justification.

Use pumps or other proper equipment for taking out from containers. Do not siphon with your mouth using a tube. Do not drink.

When mist is generated, use respiratory equipment to prevent inhalation of mist.

In case of vapor/mist dispersion, install a closed system, local ventilation system, and/or other proper equipment for the sources of vapor/mist generation.

Avoid rough handling of containers such as falling, dropping, exposing to shock, and dragging.

Ventilation requirements:

Maintain adequate ventilation when handling indoors.

Precautions for safe handling:

Avoid falling, dropping, exposing to shock, or dragging of containers.

Wash hands and face thoroughly after handling.

Be careful with fire.

Contact avoidance:

Wear protective gloves when opening containers to eliminate a risk of hand injury.

Use care to keep away from any possible contact with halogens, strong acids, alkalis, and acidifying substances.

Contact with and storage in the same location of halogens, strong acids, alkali and oxidized substances must be avoided.

Hygiene measures:

After handling Wash hands thoroughly.

### Storage

Storage conditions: Store in a well-ventilated, cool, dry, dark place, protecting from direct sunlight and keeping away from any potential ignition sources and high-temperature materials.

Store tightly stopped after use to prevent possible contamination with dust and moisture.

Preferably, store locked up in a proper storage area.

Safety  
adequate  
container  
materials:

Use spill-proof containers that are free of damage/corrosion.

## 8. Exposure controls/personal protection

Appropriate engineering controls: In case of mist generation, enclose the source of mist generation, or install a ventilation system.

Install eye cleaning and body cleaning equipment near the handling site.
