

AISIN

REMANUFACTURED HYBRID BATTERIES

AISIN introduces the ideal solution for hybrid vehicle owners experiencing low performance and low fuel economy due to battery degradation and loss of battery capacity. AISIN remanufactured hybrid vehicle batteries are now available for select Toyota and Lexus vehicles (see back for applications).

BODY & ELECTRONICS

Premium Remanufactured Hybrid Batteries for Select Toyota and Lexus Vehicles

As with all AISIN products, our remanufactured batteries are crafted with the utmost care to meet OEM specifications, ensuring the quality, reliability, and ease of installation you expect from an AISIN product. Each module undergoes an array of tests, guaranteeing its health and capacity before assembly, and is remanufactured to meet the stringent standards set by the U.S. Department of Energy, the Society of Automotive Engineers (SAE), and the U.S. Advanced Battery Consortium Testing Standards.

Intended for professional installation only, AISIN remanufactured hybrid batteries are drop shipped to the installer in secure, impact-resistant padded cases that serve as return packaging for battery cores.
