# ULTRA-PREMIUM BRAKE CALIPERS

## OPTIMAL NVH PERFORMANCE

Our ultra-premium complete caliper assemblies are designed to work in partnership with our application-specific friction and rotors. Made from both iron and aluminum alloy, they are meticulously constructed using OE-quality precision machining, ensuring excellent NVH performance, which reduces vibration-related noise during braking.

# BRAKE CALIPERS

Our leak-free brake caliper assemblies are extensively tested to ensure maximum safety and reliability. Both phenolic and steel caliper pistons are used, depending on the application.

## FEATURES AND BENEFITS

### Complete caliper assembly

Includes all components except the brake pads

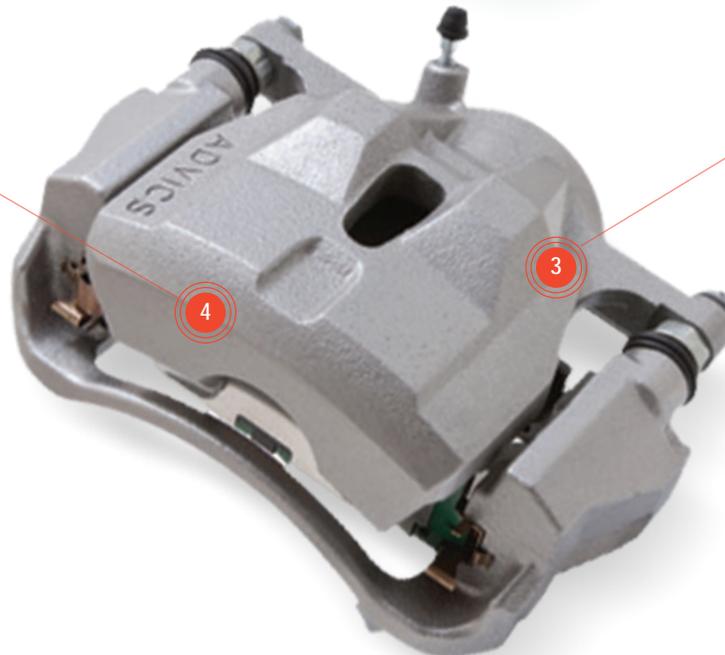

### Excellent Noise, Vibration and Harshness (NVH) Performance

Produces the quietest performing aftermarket brake caliper

### Low-drag Torque

Decreases brake fade caused by overheating

### Constructed from iron and aluminum alloy

Ensures maximum safety and reliability
